## 2. INTRODUCTION

### Gold Exchange Traded Fund (ETF) and Kotak Gold ETF

Securities and Exchange Board of India, vide its circular number SEBI/IMD/CIR No.4/58422/06 dated January 24, 2006 has enabled mutual funds in India to offer mutual fund schemes that invest in physical Gold. This policy initiative helps mutual fund investors to diversify into new asset classes and thus reduce risks associated with concentrating investments into one or a few asset classes.

Exchange-traded funds are a relatively recent innovation to the investment company concepts, with the first ETF introduced in 1993 in the USA. However, ETFs - number of ETFs and assets under management of ETFs have grown dramatically in the last one and a half decades.

ETFs are registered investment companies, most of which seek to mirror the return of a particular market index, such as the S&P 500. Investopedia describes ETF as a security that tracks an index, a commodity or a basket of assets like an index fund, but trades like a stock on an exchange, thus experiencing price changes throughout the day as it is bought and sold. An investor, by owning an ETF gets the diversification of an index fund as well as the ability to sell short, buy on margin and purchase as little as one share. The ETFs can be bought and sold through stock market brokers on payment of stock market related brokerages.

Although most ETFs are registered as open-end funds, there are some key differences between ETFs and other open – end funds such as mutual funds.

One difference is how retail investors buy and sell shares. A retail investor in a mutual fund typically purchases or redeems shares directly with the fund. By contrast, retail shareholders in an ETF do not conduct transactions directly with the ETF but instead buy or sell ETF shares on a stock exchange, just as they would sell or buy the shares of a publicly traded company. ETF shares originally enter the market through an institutional investor, known as a creation unit holder. These investors deposit with the ETF sponsor a specified basket of securities. In return for this basket of securities, the ETF issues to the creation unit holder as specified number of fund shares, which can be sold to the public through a stock exchange. A creation unit holder can liquidate its position by returning a fixed number of ETF shares to the ETF; in return, the creation unit holder receives the basket of securities from the ETF. A retail investor in an ETF could liquidate their position by selling their ETF shares on a stock exchange.

Another feature that distinguishes ETFs from open-end funds is pricing. ETF shares may trade above or below the underlying value of the securities in the fund. Unlike a mutual fund, whose price per share is based on the fund's net asset value (NAV), an ETF's share price is influenced by the forces of supply and demand. For example, when investor demand increases, the ETF share price rises. However, ETFs are structured so that large differences between their share price and the value of the underlying basket of securities do not exist for long periods of time. Creation unit holders counteract the impact of supply and demand for ETF shares by buying and selling ETF shares in the market, and if necessary, by creating or redeeming creation units with the fund. In doing so, creation unit holders help keep the market price of an ETF's share close to the underlying value of its securities.

*(Source: Fact book 2006; Institute of Capital Investments, New York)*

With increasing acceptability of ETFs in the market, ETFs to mirror different classes of assets are being introduced including ETFs to mirror the return on commodities like Gold, etc. Kotak Mahindra Mutual Fund has introduced Gold ETF based on the regulations introduced permitting the launching of Gold ETF. Three types of investors may participate in Kotak Gold ETF viz., Authorized Participants, Large Investors and Other investors. During the continuous offer, Authorized Participants and Large Investors may directly buy or redeem Gold ETF units from the Fund house; however the transactions

shall be in Creation Units Size. When the Gold ETF units are purchased or redeemed directly from the mutual fund, it creates/redeems units in predefined lot sizes called "portfolio deposit". Authorised Participants and Large Investors may purchase Gold ETF units either by portfolio deposit of gold (they buy gold and deposit with the Fund House) or by portfolio deposit in cash. When Portfolio deposit is made in cash, the mutual fund will buy gold; however, mutual fund may charge transaction handling cost (generally known as creation fee) for acquiring gold against the portfolio deposit in cash. Kotak Gold ETF accepts portfolio deposit in cash and gold for creation of units under the scheme.

The chapter on Kotak Gold ETF and the flow chart and a table listing transactions of different types of participants given under Chapter "Units and Offer", which will provide greater clarity on how Kotak Gold ETF will work.

## **A. Risk Factors**

### **Standard Risk Factors:**

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As with any securities investment, the NAV of the Units issued under the Scheme can go up or down depending on the factors and forces affecting the gold, forex markets and debt and money markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the scheme.
- Kotak Gold ETF is only the name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.2,50,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

### **Scheme Specific Risk Factors**

Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives.

### **Risks for the Fund**

- The NAV of the units is closely related to the value of gold held by the scheme. The value (price) of gold may fluctuate for several reasons and all such fluctuations will result in changes in the NAV of units under the scheme. The factors that may effect the price of gold, among other things, include demand and supply for gold in India and in the global market, Indian and Foreign exchange rates, Interest rates, Inflation trends, trading in gold as commodity, legal restrictions on the movement/trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to/from India, trends and restrictions on import/export of golden jewellery in and out of India, etc.
- Counter party Risk: There is no Exchange for physical gold in India. The Fund may have to buy or sell gold from the open market, which may lead to counter party risks for the Fund for trading and settlement.
- Liquidity Risk: The fund has to sell gold only to RBI approved bullion bankers and Canalising agents who are authorized to buy gold. Though, there are adequate numbers of players (commercial or bullion bankers) to whom the Fund can sell gold. Fund may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses.

- **Currency Risk:** The formula for determining NAV of the units is based on the imported (landed) value of gold. The landed value of gold is computed by multiplying international market price by US dollar value. The value of gold or NAV, therefore will depend upon the conversion value of US dollar into Indian rupee and attracts all the risks attached to such conversion.
- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Authorised Participant to arbitrage resulting into wider premium/ discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the scheme to buy/sell gold against the purchase and redemption requests received.
- **Asset Class Risk:** The returns from physical Gold in which the Scheme invests may underperform returns from the securities or other asset classes.
- **Physical gold:** There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- **Impact cost risk:** If the scheme is heavily subscribed and as all the subscription amount has to be deployed in gold over a short period of time, there could be a surge in the demand for gold which in turn may lead to increase in cost of acquiring gold. However, as gold can be freely imported, the demand generated, if heavily subscribed, by this scheme may get transferred to global markets and the demand of this scheme may not have any significant impact on the global level demand.
- As the scheme proposes to invest not less than 90% of the net assets in Gold, the Scheme is a passively managed scheme and provides exposure to Gold and tracking its performance and yield as closely as possible. The Schemes performance may be affected by a general price decline in the Gold prices. The Scheme invests in the physical Gold regardless of their investment merit. The Mutual Fund does not attempt to take defensive positions in declining markets.
- Tracking error may have an impact on the performance of the scheme. However KMAMC will endeavour to keep the tracking error as low as possible.

### **Risks for Investors**

- Investors may note that even though this is an open-ended scheme, they will have to buy or sell units of the scheme at market price on the stock exchanges where these units are listed for liquidity, subject to the rules and regulations of the exchange. Buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/broker, payment of brokerage, applicable statutory levies etc.,
- The concept of Exchange Traded Funds is relatively new to Indian capital markets. Trading in Gold ETF could therefore be restricted due to which market price may or may not reflect the true NAV of Gold ETF at any point of time. Also there can be no assurance that an active secondary market will develop or be maintained for the Scheme units.
- The market price of ETF units, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the unit (or NAV), and (2) demand and supply of units in the market. Sizeable demand or supply of the units in Exchange may lead to market price of the units to quote at premium or discount to NAV. Hence the price of ETF is less likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.
- **Capital Gains Impact:** Investors who trade in Kotak Gold ETF may be subject to Long Term Capital Gains or Short Term Capital Gains. Investors are requested to consult their tax / legal consultants before investing in the scheme.

- The Fund may have to sell gold to meet recurring expenses due to which underlying assets may deplete to that extent.
- The NAV of the units is determined based on the formula for valuation of gold prescribed by SEBI whereas the actual price of gold in the market may be different from the value of gold arrived at, based on the prescribed formula. This may lead to extreme conditions like NAV being far too different from the domestic market price of gold. In such extreme conditions, the trustees reserve the right to delay or suspend the redemption of units.
- The units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund depend up on the confirmations to be received from depository (ies) on which the mutual fund has no control.

### **Risk of investing in Gold Monetization Scheme (GMS)**

Kotak Gold ETF shall, as permitted by SEBI, invest a part of its pool of physical gold assets in Gold Monetisation Scheme run by Banks. Under the GMS, Kotak Gold ETF will deposit its physical gold assets as principal with the Banks which offer such facility (“the issuer”). A situation could arise where the issuer is unable to return the principal physical gold to Kotak Gold ETF upon maturity or in case of an early redemption. Such inability to return physical gold could arise on account of liquidity problems or general financial health of the issuer. A default by the issuer under a GMS may result in losses to the Unit holders. GMS being an unlisted and non-transferrable security can be Redeemed only with the issuer and hence, is subject to the risk of an issuer’s inability to meet principal and interest payments on the obligation (credit risk). Credit Risk means that the issuer of a Security may default on interest payments or even paying back the principal amount on maturity (i.e. the issuer may be unable to make timely principal and interest payments on the Security) which may result in losses to the Unitholders.

### **B. Requirement of Minimum Investors in the Scheme**

The requirement of minimum number of investors in the scheme is not applicable to Kotak Gold ETF.

### **C. Special Considerations**

- a. Prospective investors should review/study SAI along with SID carefully and in its entirety and shall not construe the contents hereof or regard the summaries contained herein as advice relating to legal, taxation, or financial/investment matters and are advised to consult their own professional advisor(s) as to the legal or any other requirements or restrictions relating to the subscriptions, gifting, acquisition, holding, disposal (sale, transfer, switch or redemption or conversion into money) of units and to the treatment of income (if any), capitalization, capital gains, any distribution, and other tax consequences relevant to their subscription, acquisition, holding, capitalization, disposal (sale, transfer, switch or redemption or conversion into money) of units within their jurisdiction/nationality, residence, domicile etc. or under the laws of any jurisdiction to which they or any managed Funds to be used to purchase/gift units are subject, and also to determine possible legal, tax, financial or other consequences of subscribing/gifting to, purchasing or holding units before making an application for units.
- b. Neither this SID and SAI, nor the units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or subject to registration and accordingly, any person who gets possession of this SID is required to inform themselves about, and to observe, any such restrictions. It is the responsibility of any persons in possession of this SID and any persons wishing to apply for units pursuant to this SID to inform themselves of and to observe, all applicable laws and Regulations of such relevant jurisdiction. Any changes in SEBI/NSE/RBI regulations and other applicable laws/regulations could have an effect on such investments and valuation thereof.

- c. Kotak Mahindra Mutual Fund/AMC has not authorised any person to give any information or make any representations, either oral or written, not stated in this SID in connection with issue of units under the Schemes. Prospective investors are advised not to rely upon any information or representations not incorporated in the SAI and SID as the same have not been authorised by the Fund or the AMC. Any purchase or redemption made by any person on the basis of statements or representations which are not contained in this SID or which are not consistent with the information contained herein shall be solely at the risk of the investor. The investor is requested to check the credentials of the individual, firm or other entity he/she is entrusting his/her application form and payment to, for any transaction with the Fund. The Fund shall not be responsible for any acts done by the intermediaries representing or purportedly representing such investor.
- d. If the units are held by any person in breach of the Regulations, law or requirements of any governmental, statutory authority including, without limitation, Exchange Control Regulations, the Fund may mandatorily redeem all the units of any Unit holder where the units are held by a Unit holder in breach of the same. The Trustee may further mandatorily redeem units of any Unit holder in the event it is found that the Unit holder has submitted information either in the application or otherwise that is false, misleading or incomplete.
- e. If a Unit holder makes a redemption request immediately after purchase of units, the Fund shall have a right to withhold the redemption request till sufficient time has elapsed to ensure that the amount remitted by the Unit holder (for purchase of units) is realized and the proceeds have been credited to the Scheme's Account. However, this is only applicable if the value of redemption is such that some or all of the freshly purchased units may have to be redeemed to effect the full redemption.
- f. In terms of the Prevention of Money Laundering Act, 2002 ("PMLA") the rules issued there under and the guidelines/circulars issued by SEBI regarding the Anti Money Laundering (AML) Laws, all intermediaries, including mutual funds, are required to formulate and implement a client identification programme, and to verify and maintain the record of identity and address(es) of investors.
- g. If after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, the AMC shall report any such suspicious transactions to competent authorities under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI, furnish any such information in connection therewith to such authorities and take any other actions as may be required for the purposes of fulfilling its obligations under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI without obtaining the prior approval of the investor/Unit holder/any other person.
- h. The AMC offers portfolio management service. The AMC has renewed its registration obtained from SEBI vide Registration No. – INP000000837 dated November 13, 2018 to act as a Portfolio Manager under the SEBI (Portfolio Managers) Regulations, 1993. The said certificate of registration is valid unless it is suspended or cancelled by SEBI.

Kotak Mahindra Pension Fund Limited, a subsidiary of the AMC is providing pension fund management services. The AMC has received no objection certificate from SEBI for management of pension funds through its subsidiary.

The AMC has received in-principle approval from SEBI for acting as an investment manager for Kotak Alternative Investment Fund Trust. No Scheme(s) have yet been launched under the AIF Fund.

The AMC has received No objection from SEBI for providing non-binding offshore advisory services to offshore funds. The AMC has not yet commenced providing non-binding offshore advisory services.

The AMC has systems in place to ensure that there is no conflict of interest between the aforesaid activities.

### **Types of investors:**

The following three types of investors may subscribe to the units of the scheme:

- **Authorised Participants (AP):** AP is an entity engaged by AMC to undertake the responsibility of a market maker and ensure liquidity in the stock market. The role of AP will endeavour to assure liquidity for Kotak Gold ETF units in the stock exchanges where the units are listed. AP will offer buy and sell quotes in the market such that buy and sell orders get executed in the market subject to price compatibility. AP will deliver ETF units out of the creation units purchased during NFO, where AP has net delivery obligation in the market. If AP's net delivery obligation is more than the stock of ETF available with it, AP may place purchase request with the Fund house. If the AP has a net buy position (need to settle in cash), AP may redeem units with the Fund House for generating cash.
- **Large Investors (LI):** LI may buy and redeem units in creation unit size from the Fund directly on any business day at applicable NAV price and applicable entry load.
- **Other Investors:** Investors other than AP and LI may buy or sell Kotak Gold ETF units from the stock market only, on an ongoing basis.

#### **1. Requirement of Demat account for investing in the scheme:**

The applicant under the Scheme will be required to have a beneficiary account with a Depository Participant of NSDL/CDSL and will be required to indicate in the application the Depository Participants (DP's) name, DP ID Number and the beneficiary account number of the applicant.

#### **2. Procedure for Purchase/Redemption of Units directly from the Fund:**

Only Authorised Participants/Large Investors can purchase or redeem unit directly from the Fund as per the procedure given below:

##### **a. Creation/Redemption of units in Creation Unit Size by Exchanging Portfolio Deposit**

The Fund creates / redeems the scheme units in large size known as "Creation Unit". The value of the "Creation Unit" is 10000 gram of physical Gold or in multiple thereof called as the "Portfolio Deposit" and a "Cash Component" which will be exchanged for corresponding number of units. The Portfolio Deposit and Cash Component may change from time to time and will be announced by Fund on its website.

##### **b. Procedure for Creating Scheme's units in Creation Unit Size**

AP/LI may deposit requisite physical gold constituting the Portfolio Deposit and Cash component. The physical gold may be deposited with the Custodian for the physical gold for the scheme. As per the agreement with Custodian for physical gold, Custodian will accept physical gold only if the gold is in compliance with the Good Delivery norms as specified by LBMA which are as under:

The Custodian shall ensure that all Gold deposited by the AMC with the Custodian is accompanied by the following:

(a) Original Assay Certificate; (b) Bar list from the refiner; (c) relevant shipping documents (airway bill and customs invoice) establishing that the gold has been shipped directly from a Good London Refiner using an accredited international shipping company on a door to door basis through one of the accredited agencies; and (d) such other documents that the Custodian may require from time to time so as to adequately indicate the purity of the Gold deposited with it. The Custodian will ensure that all

Gold deposited with it is accompanied by the above documents and that the Gold bars indicate that the fineness is 995 or above.

The cash component may be paid to the AMC by way of a cheque or pay order or demand draft. On confirmation of the quality and quantity of the physical gold and realization of cheque/pay order/DD for the cash component, the AMC will have the corresponding number of units credited to the depository account of the AP/LI.

The Portfolio Deposit and Cash Component for the Scheme may change from time to time due to change in NAV.

### Purchase Price

Price of 1 gm gold	1	2,660.00
Value of 1 kg gold (i.e. 1 portfolio deposit or 1 creation unit)	2	2,660,000.00
Cash Component (say)	3	10,000.00
Net Assets	$4=(2+3)$	2,670,000.00
No. of units in creation unit	5	10,000.00
NAV per unit	$6=(4/5)$	267.00

In addition to the NAV, any person transacting with the fund will have to reimburse transaction charges as mentioned elsewhere in the Scheme Information Document.

\*\*Cash component = custodian and incidental charges

Subject to receipt of minimum amount of investment during the New Fund Offer, allotment of units will be made to the extent of units in whole figures. The balance amount represented for fractional units will be refunded to the investor.

Suppose an investor invests	A	Rs. 20,000
Load @ 1%	B	Rs. 200
Net Assets	$C = (A-B)$	Rs. 19,800
NAV	D	Rs. 267
No. of units	$E = (C/D)$	74.1573034
Actual Units allotted	F	74
Balance fractional units refunded to unitholders	$G = (0.1573 * D)$	Rs. 42.00

The Purchase Price for every Working Day will be released to the press for publication in at least in two daily newspapers. Further the Fund shall also declare the portfolio composition (gold and cash equivalents), for purchase and redemption of 'Creation Unit Size', at the beginning of each day on its website [assetmanagement.kotak.com](http://assetmanagement.kotak.com).

On going purchases directly from the Mutual Fund would be restricted to Authorized Participants and Large Investors. Authorised Participants and Large Investors may buy the units on any business day for the scheme directly from the Mutual Fund at applicable NAV and entry load, in creation unit size. Every creation unit shall have total monetary value in Rupee terms equivalent to that day's portfolio deposit and cash component.

### c. Procedure for Redeeming Scheme's units in Creation Unit Size

AP/LI may submit Redemption request transaction form prescribed by the AMC enclosed with redemption request slip used in the depository system duly acknowledged by the depository participant with which AP/LI has a depository account. After successful verification of the redemption request, the AMC will instruct its Custodian to transfer the Portfolio Deposit to the custody account of AP/LI or have it delivered to AP/LI at the location instructed by AP/LI and remit the cash component after adjusting transaction handling, other applicable charges and the difference between the applicable NAV and closing price of gold.

The AMC may redeem Creation Unit of Scheme units prior to receipt of all or portion of the relevant units in certain circumstances where the purchaser, among other things, posts collateral to secure its obligation to deliver such outstanding units.

The Portfolio Deposit and Cash Component for the Scheme may change from time to time due to change in NAV.

#### **Allotment of units and fractional units**

During continuous offer, fractional units may have to be allotted depending on the applicable NAV/allotment price. Units will be allotted on the date of realization of cheque. Stock exchanges may not allow trading of fractional units. Trustees may, with a view to avoid creation of fractional units, decide to allot units only in integers by rounding off the units allotted to the lower integer and the balance will be refunded to the investor.

#### **d. Redemption method**

Unitholder (large investor or authorized participant) may submit to any of the offices of AMC Redemption request Form with a copy of redemption request duly acknowledged by the depository participant.

The depository participant will process the request and forward the same to Registrar to the Scheme in the normal course.

The time taken for confirmation of repurchase of units is dependent upon the timelines and procedures of depositories.

Redemption proceeds will be sent to the unitholder within 10 business days from the date of confirmation with the depository records.

#### **e. Buying /Selling through the Stock Exchange**

Buying / Selling units on the stock exchange is just like buying / selling any other normal listed securities. If an investor has bought units, an investor has to pay the purchase amount to the broker / sub-broker such that the amount paid is realised before the funds pay-in day of the settlement cycle on the exchange. If an investor has sold units, an investor has to deliver the units to the broker/sub-broker before the securities pay-in day of the settlement cycle on the exchange. The units (in case of units bought) and the funds (in the case of units sold) are paid out to the broker on the payout day of the settlement cycle on the exchange. The trading member would pay the money or deliver the units to the investor in accordance with time prescribed by the stock exchange regulations.

If an investor has bought units, he should give standing instructions for 'Delivery-In' to his/her DP for accepting units in his/her beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her trading member. The trading member will transfer the units directly to his/her beneficiary account on receipt of the same from exchange's clearing corporation.

An investor who has sold units should instruct his/ her Depository Participant (DP) to give 'Delivery Out' instructions to transfer the units from his/her account to the trading member account through whom he/she have sold the units. The details of the pool A/c of his/her trading member to which the units are to be transferred, unit quantity etc should be mentioned in the delivery out instructions given by him/her to the DP. The instructions should be given will before the prescribed securities pay-in

day. SEBI has advised that delivery out instructions should be given atleast 24 hours prior to the cut off time for the prescribed securities pay in An investor who has sold to avoid any rejection of instructions due to data entry errors, network problems, etc.

The above procedure relating to purchase and sale of units by different types of investors/participants in the scheme is tabulated for easy reference

### 3. Investment in GOLD ETF

#### Investment in Gold

The Fund would invest in gold in domestic markets and endeavor to track the spot price of gold.

#### Mode of Investment

After the close of NFO, the scheme may purchase physical gold of the prescribed quality from a bank or any other institution or by way of imports or by way of purchase from local market.

#### Purchase Consideration

During the continuous offer, the Scheme accepts Portfolio deposit in creation unit size in the form of physical gold or cash. When Authorised Participant or Large Investor deposits cash, the fund will purchase physical gold from RBI approved bullion bankers and Canalising agents, after setting aside cash to meet liquidity requirement, if necessary, out of the cash so collected. As per the prevailing market practice, custodians of gold will accept deposit of gold in standard one KG bars tendered for delivery through selected set of gold custodians. The Custodian for the scheme decides the selection of list of such custodians i.e. The Bank of Nova Scotia. The Custodian for this scheme will not accept gold from anyone except when tendered through Brinks Arya India (P) Ltd, Group4 Securicor, Viamat or such other recognised entities. Authorised Participants and Large investors may on any business day, buy units from the scheme by paying amount equal to creation unit size or gold equivalent to creation unit size. When cash (cheque/pay order/demand draft) is deposited, the Scheme will endeavor to issue units simultaneously on receiving clear funds and purchase of physical gold.

- **Dematerialization**

- Units of the Scheme will be available in Dematerialized (electronic) form only.

- b. The applicant under the Scheme will be required to have a beneficiary account with a Depository Participant of NSDL/CDSL and will be required to indicate in the application the Depository Participants (DP's) name, DP ID Number and the beneficiary account number of the applicant.

Units of the Schemes will be issued, traded and settled compulsorily in dematerialized form.

### 3. INFORMATION ABOUT THE SCHEME

#### Kotak Gold ETF

##### A. Type of the scheme:

An open ended scheme replicating/ tracking physical gold prices.

##### B. What is the investment objective of the scheme?

The investment objective of the scheme is to generate returns that are in line with the returns on investment in physical gold, subject to tracking errors.

However, there is no assurance that the investment objective of the Scheme will be achieved.

#### Tracking Error

Tracking error means the variance between daily returns of the underlying benchmark against the imported (landed) price of Gold, based on the formula prescribed by SEBI as per Gazette Notification dated December 20, 2006.) and the NAV of the scheme for any given period.

NAV of the Scheme is dependant on valuation of gold. Gold has to be valued based on the formula as per Gazette Notification dated December 20, 2006. NAV so computed may vary from the price of Gold in the domestic market.

Tracking error could be the result of a variety of factors including but not limited to:

- a. Delay in the purchase or sale of gold due to
  - Illiquidity of gold,
  - Delay in realisation of sale proceeds,
  - Creating a lot size to buy the required amount of gold
- b. The scheme may buy or sell the gold at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- c. The potential for trades to fail, which may result in the Scheme not having acquired gold at a price necessary to track the benchmark price.
- d. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- e. Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
- f. Execution of large buy / sell orders
- g. Transaction cost (including taxes and insurance premium) and recurring expenses
- h. Realisation of Unit holders' funds

The scheme will endeavor to minimise the tracking error by

- a. Setting off of incremental subscriptions against redemptions,
- b. Rebalancing of the portfolio

### C. How will the scheme allocate its assets?

The asset allocation under the Scheme, under normal circumstances, is as follows:

Investments	Indicative Allocation (% to net assets)	Risk Profile
Physical Gold	95% to 100%*	Low to Medium
Debt and money market instruments	0% to 5%	Low

\* As the scheme invests 95% to 100% of the net assets into Gold, the scheme will, by and large, be passively managed fund. However, if and when the scheme is permitted to invest in gold related securities including derivatives, the scheme may become actively managed fund.

As per Regulation 43(4) of SEBI (Mutual Fund) Regulations, money collected under any gold exchange traded fund scheme shall be invested only in gold or gold related instruments in accordance with sub regulation (5) of Regulation 44. As per sub-regulation 44(5)(b), the funds of any gold exchange traded fund scheme shall be invested only in gold or gold related instruments in accordance with its investment objective, except to the extent necessary to meet the liquidity requirements for honouring repurchases or redemptions, as disclosed in the offer document. The Scheme will invest in physical gold of the prescribed quality and standard.

The Scheme may retain some part of the cash or may invest in money market and debt instruments under the following conditions in addition to the reasons specified in Regulation 44(5)(b):

- Residual cash after buying gold in multiples of standard quantity in the market
- To meet recurring expenses for a reasonable period
- To meet redemption requirements of Authorised Participants and Large Investors.

The scheme may investment in gold monetisation schemes (“GMS”) of banks in accordance with extant SEBI/RBI guidelines and any subsequent amendments thereto specified by SEBI and/or RBI from time to time.

#### Overview of Gold

Ever since Gold was discovered, it has captured the imaginations of craftsman and artisans. Not only is gold pleasing to the eye, but also its resistance to corrosion and malleability has made it an ideal metal for craftsmen to mold into pieces of adornment, as well as a symbol of wealth and power. As the ancient philosopher Pinder wrote nearly 3,000 years ago, "Gold is the child of Zeus, neither moth nor rust can devoureth it".

Gold also has a long history of being a store of value. Gold is primarily a monetary asset partly a commodity. More than two thirds of gold's total accumulated holdings account as 'value for investment' with central bank reserves, private players and high-carat Jewellery. Gold is considered to be a safe haven of value against inflation.

#### Gold as medium of exchange:

Gold's use as a medium of exchange predates the Roman Empire. The Chinese and Hindu cultures used Gold as the basis for their coinage.

In 1816, Great Britain adopted a gold-backed paper currency and the rest of the industrialized world shortly followed suit. Prior to 1934, the United States Dollar was equal to 1/20th of an ounce of gold, redeemable upon request. Except for a brief halt of conversions from dollars for Gold during World War II, the United States Dollar was backed by Gold under an agreement known as the Bretton Woods agreement. Under Bretton Woods, the United States Dollar, and other global currencies, were

tied to a value of Gold. From 1934 to 1968, this amount was \$35/oz of gold. To protect the amount of Gold held in reserve for protecting the dollar, it was illegal for United States citizens to own Gold prior to President Nixon's revocation of the Gold Standard. Upon revocation of the Gold Standard, Gold became a popular investment medium.

### **Gold Market, measure and FIX (pricing)**

The Gold market is highly liquid and gold held by central banks, other major institutions and retail Jewelry keep coming back to the market.

The pureness of Gold is measured in terms of carats, with 24 carats being 99.99 percent pure. The most popular carat rankings of Gold are 18 and 14 carat pure, representing 75% and 58.3% pure, respectively. The most popular carat for jewelry in Europe is 18 and 14, as it is in the United States. In the Middle East, India, and South East Asia, where jewelry is used as much as an investment as it is for decoration, 22 carat is more popular. In these countries, 22 carat items usually sell at a marginal markup to the metal value (usually 10 to 20%). These items can be traded in or sold back to distributors at any time. England has, in recent years, begun manufacturing 9 carat jewelry items, while Portugal has a unique designation of 19.2 carats. Given that Gold demand is so closely tied to the jewelry industry, the fortunes of both industries tend to rise and fall in tandem.

Some mining companies refer to their output in terms of ounces. Others use the metric system. In general, gold is thought of in terms of the troy ounce, which takes its name from the old French city of Troyes, where there was a regular marketplace at which gold was traded.

London has been the center of Gold trading since the 17th century. The Australian Gold rush of 1852, and the discovery of Gold in South Africa in 1886, solidified London's grip on the Gold market as Gold from these locals channeled through London for refining and distribution. As a center for distribution of Gold, London began a method for disseminating the price of Gold known as the "Fix" in 1919. Held at N.M. Rothchild's at 10:30 am (Morning) and at 3:00pm (Afternoon) Fix. The Fix is a single price for Gold where the members, or Fixing Seat Holder's, match up their entire buy and sell orders. The price, at which the most buy and sell orders match, or balance, is known as the Fix. The strength of the fix is that a large volume of physical Gold can be bought or sold at a single, clearly posted price. The fix is a benchmark price for many transactions worldwide, whether for mines, fabricators or central banks, because it is undisputed prices at which all six of the largest Gold trading houses are willing to do business

### **Gold - Supply and holdings:**

Gold is produced from mines on every continent with the exception of Antarctica (where mining is forbidden), in operations ranging from the tiny to the enormous. The best estimates available suggest that the total volume of gold mined over history is approximately 155,500 tones, of which around 64% has been mined since 1950.

**The following are the world's largest producers of gold (based on the data for the year Jun-2019):**

### Demand / Consumption Considerations

1. **Jewelry Fabrication:** Jewelry fabrication is the crucial cornerstone of demand for this yellow metal. Since 1991, over 2,000 tonnes of Gold has been used annually in the production of jewelry. Gold for use in the jewelry industry accounts for roughly 54% of the total demand - an estimated 54.2 million ounces.
2. **Industrial applications:** Due to Gold's virtues of malleability, ductility, reflectivity, resistibility to corrosion and unparalleled ability as a thermal and electric conductor, Gold is used in a wide variety of industrial applications. The largest industrial user is the electronics industry. Gold is used in everything from microprocessors, semiconductors, integrated circuits, transistors, printed circuit boards, pocket calculators, washing machines, televisions, missiles and spacecraft. Japan and the United States are the largest industrial users of Gold, accounting for 45% and 30% of its industrial use, respectively.
3. **Gold as investment:** Gold as an investment or "hoarding" vehicle is the third largest component of demand. The concept of a bullion coin made by a government or in the form of small bars issued by banks and sold at a low premium to the base bullion amount, has endeared Gold as an investment vehicle for small investors. Together, the small bar and coin demand accounts between 807 and 178 tonnes of Gold on an annual basis.

### Factors affecting gold prices:

- **Central banks' sale:** central banks across the world hold a part of their reserves in gold. The quantum of their sale in the market is one of the major determinants of gold prices. A higher supply than anticipated would lead to subdued gold prices and vice versa. Central banks buy gold to augment their existing reserves and to diversify from other asset classes. This acts as a support factor for gold prices

- **Producer mining interest:** Bringing new mines on-line is a time consuming and at times economically prohibitive process that adds years onto potential supply increases from mining production. On the other hand, lower production has a positive effect on gold prices. Conversely excessive production capacities would lead to a downward movement in gold prices as the supply goes up
- **Macro-economic factors:** A weakening dollar, high inflation, the massive US trade deficits all act in favor of gold prices. The global trend of rising interest rates also had a positive impact on gold prices. Gold being regarded as a physical asset would lose its luster in a deflationary environment as gold is used effectively as an inflation hedge
- **Geo political issues:** Any uncertainty on the political front or any war-like situation always acts as a booster to gold prices. The prices start building up war premiums and hence such movements. Stable situations would typically mean stable gold prices
- **Seasonal demand:** Since the demand for Gold is closely tied to the production of jewelry, Gold prices tend to increase during the times of year when the demand for jewelry is the greatest. The seasons around Christmas, Mothers Day, Valentine's Day, summer wedding season in India, Deewali, AkshayaTrithya festival in India are all major shopping seasons and hence the demand for metals tends to be strong a few months ahead of these holidays. The second and third quarters are usually seasonally low with a relative absence of major gold giving occasions.

### **Gold in India**

India is the largest consumer of gold in the world accounting for more than 23% of the total world demand annually. According to unofficial estimates, India has more than 13,000 tonnes of hoarded gold. Gold occupies a prominent part in rural Indian economy and a significant part of the rural credit market revolves around bullion as a security.

India being the largest consumer of gold in the world, with minimal domestic supply, the demand is met mainly from imports. According to World Gold Council, in 2014 India absorbed around 769 tons from the world market, compared to 320 tons in 1994; that is without taking into account the recycling of scrap from the immense stock of close to 10,000 tones built up on the sub-continent in the last few hundred years, or gold imported for jewelry manufacture and re-export.

India is the world's second largest gold jewellery market by volume accounting for around 727 tonnes of consumption demand in 2017. Gold jewellery buying is associated with a number of festivals and, in particular, with weddings. The gold given at weddings is important for women, as it traditionally remains her property. For festivals, Diwali is a traditional gold giving occasion. Dusshera and AkshayaTritiya has become important festival in South India for purchase of gold.

A feature of Indian demand is its extreme sensitivity to price volatility - this is the country where price factor is of most importance in affecting gold demand.

Over half of demand comes from rural or rural town areas. Demand here is largely traditional. It is affected by incomes and thus the quality of the monsoon is important. In these areas gold is also important as a means of saving - a gold chain or bangle, which can be worn on the person, is considered a relatively safe way of storing wealth.

**Gold market in India:**

Banks in India sell gold in the form of small bars. Household investors buy gold in small bar forms as an investment. Gold for Jewelry purposes is bought from the jewelers and artisans. There are a few bullion dealers who buy and sell gold in large quantities to and from jewelers.

Gold related instruments can be actively traded in India on the MCX as well as NCDEX exchanges. As per directions of the Forward Markets Commission, currently the trading timings are from 10.00 am to 11.30 pm Monday to Friday and from 10.00 am to 2.00 pm on Saturdays. On the expiry date, contracts expiring on that day will not be available for trading after 5.00 pm. The FMC however may vary these timings with due notice. The minimum amount that can be traded is 100 grams.

**D. Where will the scheme invest?**

The Fund would invest in gold and endeavor to track the spot price of gold in domestic markets. Kotak Gold ETF will invest all of its funds, except to meet its liquidity requirements, in physical gold and to that extent follows a passive investment strategy. However, if and when the scheme is permitted to invest in gold related securities including derivatives, the scheme may become actively managed fund.

Till the investments are made in accordance with the investment objective, the scheme may invest in Liquid scheme of Kotak Mahindra Mutual Fund or in liquid schemes under the management of any other asset management company, not exceed 5% of the net asset value of Kotak Mahindra Mutual Fund.

**E. What are the investment strategies?**

The Fund would invest in gold and endeavor to track the spot price of gold in domestic markets. Kotak Gold ETF will invest all of its funds, except to meet its liquidity requirements, in physical gold and to that extent follows a passive investment strategy. However, if and when the scheme is permitted to invest in gold related securities including derivatives, the scheme may become actively managed fund.

Till the investments are made in accordance with the investment objective, the scheme may invest in Liquid scheme of Kotak Mahindra Mutual Fund or in liquid schemes under the management of any other asset management company, not exceed 5% of the net asset value of Kotak Mahindra Mutual Fund.

**Risk control measures for investment strategy**

The scheme aims to track the domestic gold price of physical gold as closely as possible post expenses. Since fund manager risk is not relevant, the risk control measures for investment strategy pertain to managing operational risks focused on minimizing tracking error. Time-wise processes are well defined to enable efficient rebalancing of the portfolio and settlements with the Authorised Participants and Custodians.

**Risk mitigation measures for portfolio volatility**

ETF being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of portfolio volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility on account of fund manager decisions. The fund manager would endeavour to keep cash levels at the minimal to control tracking error.

### **Risk mitigation measures for managing liquidity**

The scheme invests in physical gold bars which are approved by and satisfy the good delivery norms set out by London Bullion Market Association and are very widely accepted for the purpose of trading. Gold as a commodity is traded globally and thereby very liquid. The scheme buys and sells its gold from banks predominantly, which are big players in the gold market.

### **Portfolio Turnover**

Portfolio Turnover is a term used to measure the volume of trading that occurs in a Scheme's portfolio (gold in this scheme) during a given time period. Kotak Gold ETF is an open-ended scheme. It is therefore expected that there would be a number of subscriptions and redemptions on a daily basis through Authorised participants and Large Investors that may require purchase or sale of gold. The Scheme is largely passive but transactions of Authorised Participants, Large Investors, sale of gold to meet expenses of the scheme and dividend payments may require the scheme to buy and sell gold.

Portfolio Turnover is defined as the aggregate of purchases and sales as a percentage of the corpus during the specified period of time.

### **I. What are the investment restrictions?**

The following investment limitations and other restrictions, inter-alia, as contained in the Trust Deed and the Regulations apply to the Scheme:

1. The AMC uses a "passive" approach to try and achieve scheme investment objective. The scheme invests in gold as an asset regardless of such investment merit.
2. The scheme shall invest in gold of 0.995 fineness.
3. As per Regulation 44(5)(b), the scheme may invest all its funds in gold in accordance with its investment objectives, except to the extent necessary to meet the liquidity requirements for honouring repurchase or redemptions, as disclosed in the SAI.
4. No loans may be advanced by the Mutual Fund and the Fund shall not borrow except to meet temporary liquidity needs of the Fund for the purpose of repurchase, redemption of Units or payment of interest or dividends to Unitholders, provided the Fund shall not borrow more than 20% of the net assets of the Scheme and the duration of such borrowing shall not exceed a period of six months or as may be permitted by the Regulations from time to time.
5. The Scheme, out of the funds allocated to invest in debt securities, to the extent necessary to meet the liquidity requirements for honouring repurchase or redemptions, may invest in another scheme, under the same AMC or any other mutual fund provided that the aggregate interscheme investments made by all schemes under the same AMC or any other mutual fund shall not exceed 5% of the net assets of the Fund or any other limit as prescribed by the Regulations from time to time. The AMC is not permitted by the Regulations to charge any investment management and advisory services fee on such investments.
6. The Scheme shall not invest in any Fund of Funds Scheme.
7. Wherever investments are intended to be of a long-term nature, the securities shall be purchased or transferred in the name of the Fund, on account of the Scheme concerned.

Apart from the above investment restrictions, the Fund follows certain internal norms vis-à-vis limiting exposure to scrips, sectors etc, within the above mentioned restrictions, and these are subject to review from time to time

Modifications, if any, in the Investment Restrictions on account of amendments to the Regulations shall supercede/override the provisions of the Trust Deed.

### C. Computation of NAV

The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

The Fund shall value its investments according to the valuation norms, as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

NAV of Units under the Scheme will be calculated as shown below:

$$\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments}^* + \text{Current assets including Accrued Income} - \text{Current Liabilities and provisions including accrued expenses}}{\text{No. of Units outstanding under the Scheme/Option.}}$$

\* Includes value of physical gold computed as described under accounting policies and market value of debt and money market instruments invested under the scheme.

NAV for the Scheme and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto four decimals. The NAV of Direct Plan will be different than the NAV of Regular Plan.

The AMC may also calculate intra-day indicative NAV and publish the same on its website [assetmanagement.kotak.com](http://assetmanagement.kotak.com). Intra-day NAV will not have any bearing on the creation or redemption of units directly with the Fund by the AP/LI.

## 5. FEES AND EXPENSES

This section outlines the expenses that will be charged to the schemes.

### A. New Fund Offer (NFO) Expenses

This is an ongoing scheme on the date of updating this document

### B. Total Expense Ratio (TER)

Total Expense Ratio is the total of ongoing fees and operating expenses charged to the scheme, expressed as a percentage of the scheme's daily net assets.

These fees and expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, brokerage/commission, marketing and selling costs etc.

The total expense ratio of the scheme including the investment and advisory fees shall not exceed 1.00 per cent of the daily net assets.

#### Total Expense Ratio for the schemes

The AMC has estimated following recurring expenses, as summarized in the below table for the scheme. Total expense ratio of the Scheme (including investment and advisory fees) will be subject to the maximum limits (as a percentage of Daily Net Assets of the Scheme) as per Regulation 52(6) & (6A), as amended from time to time, with no sub-limit on investment and advisory fees.

Expenses Structure	% of daily Net Assets
Investment Management and Advisory Fees	Upto 1.00%
Trustee fee	
Audit fees

RTA Fees	
Marketing & Selling expense incl. agent commission	
Cost related to investor communications	
Cost of fund transfer from location to location	
Cost of providing account statements and dividend redemption cheques and warrants	
Costs of statutory Advertisements	
Cost towards investor education & awareness (at least 2 bps)	
Brokerage & transaction cost over and above 12 bps and 5 bps for cash and derivative market trades resp.	
Goods and Services tax on expenses other than investment and advisory fees	
Goods and Services tax on brokerage and transaction cost	
Other Expenses	

<b>Maximum total expense ratio (TER) permissible under Regulation 52 (6)(c) (i) and (6) (a)</b>	<b>Upto 1.00%</b>
Additional expenses under regulation 52 (6A) (c) #	Upto 0.05%
Additional expenses for gross new inflows from specified cities	Upto 0.30%

# The AMC shall not charge additional expenses under Regulation 52(6A)(c) in case exit load is not levied/ not applicable

The fund shall update the current expense ratios on the website ([assetmanagement.kotak.com](http://assetmanagement.kotak.com)) at least three working days prior to the effective date of the change. The web link for TER is <https://assetmanagement.kotak.com/total-expense-ratio>

#### **Illustration of impact of expense ratio on scheme's returns:**

<b>Particulars</b>	<b>NAV p.u. in Rs.</b>	<b>%</b>
Subscription received on March 31, 2017 (A)	100.00	-
Value of Subscribed Amount before expenses as on March 31, 2018 (B)	112.25	-
Expense charged by the scheme (C)	1.00	1.00%
Value of Subscribed Amount as on March 31, 2018 (Net of expenses charged) (D)	110.00	-
Net Return to investors (E) (E=D-A)	10	10%

Illustration is given to understand the impact of expense ratio on a scheme return and this should not be construed as an indicative return of the scheme. The expenses of the Direct Plan under the Scheme will be lower to the extent of distribution expenses/ commission

In terms of the SEBI Circular no.SEBI/HO/IMD/DF2/CIR/P/2018/137 dated October 22, 2018, all fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a regular plan.

#### **Additional expenses which may be charged to the Schemes:**

- Brokerage and transaction costs (including Goods and Services tax) which are incurred for the purpose of execution of trade and is included in the cost of investment, not exceeding 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions. Any payment towards brokerage and transaction cost, over and above the said 12 bps and 5bps for cash market transactions and derivatives transactions respectively may be charged to the scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52. Any expenditure in excess of the said prescribed limit (including brokerage and transaction cost, if any) shall be borne by the AMC.
- Expenses not exceeding of 0.30 % of daily net assets, if the new inflows from beyond top 30cities are at least:
  - (i) 30 % of gross new inflows in the scheme; or
  - (ii) 15 % of the average assets under management (year to date) of the scheme; whichever is higher.

Provided that if inflows from such cities is less than the higher of sub-clause (i) or sub-clause (ii), such expenses on daily net assets of the scheme shall be charged on proportionate basis.

Provided further that expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities.

Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment.

Provided further that the additional TER can be charged based on inflows only from 'retail investors' (SEBI vide its Circular no. SEBI/HO/IMD/DF2/CIR/P/2019/42 dated March 25, 2019, has defined that inflows of amount upto Rs 2,00,000/- per transaction, by individual investors shall be considered as inflows from "retail investor") from beyond top 30 cities.

Provided that the additional commission for beyond top 30 cities shall be paid as trail only.

In case inflows from beyond top 30 cities is less than the higher of (i) or (ii) above, additional TER on daily net assets of the scheme shall be charged as follows:

Daily net assets X 30 basis points X New inflows from individual investors from beyond top 30 cities  
-----  
365\* X Higher of (i) or (ii) above

\* 366, wherever applicable.

- Additional expenses upto 0.05% of daily net assets of the schemes, incurred towards different heads mentioned under Regulation 52 (2) and 52 (4).

#### **Goods and Services tax:**

Goods and Services tax on investment and advisory fees may be charged to the scheme in addition to the maximum limit of TER as prescribed in Regulation 52(6)(c). Goods and Services tax on other than investment and advisory fees, if any, shall be borne by the scheme within the maximum limit of TER as per Regulation 52.

The aforesaid estimates are made in good faith by the Investment Manager and are subject to change inter se among the various heads of expenses and between the Plans. It may also be noted that the total expenses of the Plans will also be subject to change within the overall limits of expenses under Regulation 52. Actual expenses under any head and / or the total expenses may be more or less than the estimates. The Investment Manager retains the right to charge the actual expenses to the Fund, however the expenses charged will not exceed the statutory limit prescribed by the Regulations. Any expenditure in excess of the limits specified in Regulation 52 shall be borne by the AMC. There will be no sub limit on management fee, and it shall be within the overall TER specified above.

For the actual current expenses being charged, the investor may refer to the website of the mutual fund.

### **C. Load structure**

Load is an amount which is paid by the investor to subscribe to the units or to redeem the units from the scheme. This amount is used by the AMC to pay commissions to the distributor and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of [assetmanagement.kotak.com](http://assetmanagement.kotak.com) or may call at 1800-22-2626 or your distributor.

#### **Entry Load: Nil**

In terms of SEBI Circular No. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009, no entry load will be charged on purchase / additional purchase / switch-in. The commission as specified in aforesaid circular, if any, on investment made by the investor shall be paid by the investor directly to the Distributor, based on his assessment of various factors including the service rendered by the Distributor.

#### **Exit Load: Nil**

Any exit load charged (net off Goods and Services tax, if any) shall be credited back to the Scheme.

Units issued on reinvestment of dividends shall not be subject to entry and exit load.

The Trustee reserves the right to change the load structure of the Scheme on a prospective basis. Should the Trustee, on any date, decide to change the load structure, it will be on a prospective basis and investments made by Unitholders prior to such date will continue to attract the loads applicable prior to such change.

Investors may obtain information on loads on any Business Day by calling the office of the AMC or any of the Investor Service Centers. Information on applicability of loads will also be provided in the Account Statement.

The investor is requested to check the prevailing load structure of the scheme before investing.

For any change in load structure AMC will issue an addendum and display it on the website/Investor Service Centres.

Any imposition or enhancement in load shall be applicable on a prospective basis. The addendum detailing the changes may be attached to Scheme Information Documents and key information memorandum. The addendum may be circulated to all the distributors/brokers so that the same can be attached to all Scheme Information Documents and key information memoranda already in stock. Arrangements may be made to display the addendum in the Scheme Information Document in the form of a notice in all the investor service centres and distributors/brokers office. The introduction of the exit load/ CDSC alongwith the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load/CDSC. A public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of region where the Head Office of the Mutual Fund is situated. In case of changes in load structure the addendum carrying the latest applicable load structure shall be attached to SID already in stock till it is updated.
