

KOTAK DEBT HYBRID FUND

An open ended hybrid scheme investing predominantly in debt instruments

Investment Objective: The investment objective of the Scheme is to enhance returns over a portfolio of debt instruments with a moderate exposure in equity and equity related instruments. By investing in debt securities, the Scheme will aim at generating regular returns, while enhancement of return is intended through investing in equity and equity related securities. The Scheme may also use various derivative and hedging products from time to time, in the manner permitted by SEBI. However, there is no assurance that the objective of the scheme will be achieved.

Scheme Inception : - December 02, 2003. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. TRI – Total Return Index, In terms of Para no 7.23 of SEBI Master Circular no. HO/24/13/11(1)2026-IMD-POD-1/7602/2026 dated March 20, 2026, the performance of the scheme is benchmarked to the Total Return variant (TRI) of the Benchmark Index instead of Price Return Variant (PRI). Alpha is difference of scheme return with benchmark return. * All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS). (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. Hedging Position through Interest Rate Swaps as on 30 Apr 2026 is 8.65% of the net assets. ## Risk rate assumed to be 5.34% (FBIL Overnight MIBOR rate as on 30th Apr 2026). *** Existing investment in REITs held by debt schemes of Mutual Funds as on April 30, 2026, is grandfathered. ** Total Expense Ratio includes applicable GST.

Scheme Performances as on April 30, 2026 (unless otherwise specified)
