Product Label

This product is suitable for investors who are seeking*:

- Long term capital growth
- Investment in equity & equity related securities balanced with income generation by investing in debt & money market instruments.

* Investors should consult their financial advisors if in doubt about whether the product is suitable for them.

Fund

Benchmark

For latest Riskometer, investors may refer to an addendum issued or updated on website at www.kotakmf.com

Scheme Inception date is 25/11/1999 and Scheme Inception date of Kotak Aggressive Hybrid Fund (Erstwhile Known As Kotak Equity Hybrid Fund) - Regular plan growth option inception date is 05/11/2014. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. TRI - Total Return Index, In terms of para 6.14 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the performance of the scheme is benchmarked to the Total Return variant (TRI) of the Benchmark Index instead of Price Return Variant (PRI). Alpha is difference of scheme return with benchmark return. *All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MF Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS) (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. Hedging Position through Interest Rate Swaps as on 31 Dec 2025 is 1.78% of the net assets. Alpha is difference of scheme return with benchmark return. ## Risk rate assumed to be 5.67% (FBIL Overnight MIBOR rate as on 31st Dec 2025). **Total Expense Ratio includes applicable GST.
