Scheme Inception : - August 03, 2018. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. (N) Fully or Partly blocked against Interest Rate Swap (IRS) (N) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be less than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. Hedging Position through Interest Rate Swaps as on 31 July 2026 is 9.80% of the net assets. ** Risk rate assumed to be 5.41% (PBIL Overnight MIBOR rate as on 31st July 2026). ** The expense ratio disclosed above represents the Base Expense Ratio (BER), including applicable statutory levies on expenses forming part of the BER, but excludes brokerage, transaction costs and related statutory levies.
