

KOTAK CONTRA FUND

An open ended equity Scheme following contrarian investment strategy

Investment Objective: The investment objective of the Scheme is to generate capital appreciation from a diversified portfolio of equity and equity related instruments. The Scheme will invest in stocks of companies, which are fundamentally sound but are undervalued. Undervalued stocks are stocks of those companies whose true long term potential is not yet recognised by the market. At times, the broad market takes time to appreciate the long-term potential of some fundamentally sound companies. Stocks of such companies are traded at prices below their intrinsic value and are regarded as undervalued stocks. We believe that, over a period of time, the price of a stock reflects the intrinsic value of the underlying company. Thus, the moving up of the price of the undervalued stock towards its intrinsic value will help us generate capital appreciation for investors. There is no assurance that the investment objective of the Scheme will be achieved.

Scheme Inception : - July 27, 2005. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark.
