

KOTAK CREDIT RISK FUND

An open ended debt scheme predominantly investing in AA and below rated corporate bonds (Excluding AA+ rated corporate bonds). A relatively high interest rate risk and relatively high credit risk.

Investment Objective: The investment objective of the scheme is to generate income by investing in debt /and money market securities across the yield curve and predominantly in AA rated and below corporate securities. The scheme would also seek to maintain reasonable liquidity within the fund. There is no assurance that the investment objective of the Schemes will be realised.

Scheme Inception : - May 11, 2010. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. Since Inception returns are assumed to be starting from the inception date of the Scheme and calculated accordingly. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows and taking the time of investment into consideration. **The SIP performance details provided herein are of Regular Plan - Growth Option** Different plans have different expense structure. # Benchmark; ^ Additional Benchmark. Alpha is difference of scheme return with benchmark return. *All payouts during the period have been reinvested in the units of the scheme at the then prevailing NAV. Source: ICRA MFI Explorer. (^) Fully or Party blocked against Interest Rate Swap (IRS) (^) This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments. Hedging Position through Interest Rate Swaps as on 31 Mar 2026 is 21.70% of the net assets. ***Existing investment in REITs held by debt schemes of Mutual Funds as on March 31, 2026, is grandfathered. **Total Expense Ratio includes applicable GST.

Scheme Performances as on March 30, 2026 (unless otherwise specified)
